PROSPECTUS

Descriptive Catalogue.

SANTA CLARA COLLEGE is situated in the town of Santa Clara which is justly celebrated for the beauty of its surrounding scenery, and the mildness and salubrity of its climate. The Southern Pacific and the South Pacific Coast railroads pass through the town.

The College is conducted by the Fathers of the Society of Jesus. They are the successors of the Franciscan Fathers, the pioneers of civilization on this coast, who, as early as 1777, founded the Mission of Santa Clara, and labored zealously to elevate the moral character, and develop the material prosperity of the inhabitants. On the 19th of March, 1851, Santa Clara College was established in the old mission buildings for the purpose of affording to all who might desire it, the means of obtaining a liberal and Christian education. On the 28th of April, 1855, it was chartered with all the rights and privileges of a university.

Enclosed in a quadrangle of nearly ten acres, with most complete and appropriate accommodations in every department, and a full staff of professors, this institution presents uncommon advantages for the moral, mental, and physical training of young men and boys.

THE SCIENTIFIC BUILDING.

Class and Study Rooms.

There are eighteen class rooms and two study halls, all of which are large and well ventilated, and furnished with private desks for each student. Every branch of learning is divided into several graded classes, taught for one hour at the same time of the day, each having its respective class-room and professor. The study halls are reserved for private study and preparation, the students having there a valuable Reference Library to which they may have access at any time during their study hours.

Scientific Department.

The building is E shaped, the main front extending 110 feet, and the wings running 82 feet deep. The roof is a floored walk protected by a balustrade.

Science Lecture Room.

It contains a full assortment of pure chemicals and scientific charts, and a collection of the rarest original works of reference from the pens of the most celebrated scientists of modern times.

Chemical Laboratory.

Assaying and chemical analysis are daily practiced by the more advanced students with the aid of a five-flued smelting furnace, two cupelling furnaces, and a complete stock of chemical glassware, and utensils of every description. The Battery Room contains a Grove's battery of 190 cells; a Bunsen's battery of 140 cells; and a mammoth Bunsen of 6 cells, besides many other smaller batteries.

Philosophical Cabinet.

In the department of Physics, as well as in that of Chemistry, the students are expected to become thoroughly acquainted with practical operations, and to write lectures on different subjects, and illustrate them with experiments.

For this purpose they have a magnificent collection of instruments and machines, pertaining to mechanics, hydraulics, pneumatics, acoustics, heat, electricity, magnetism, optics, meteorology, astronomy, &c., all of which are successively used in the class-room. This very complete and costly apparatus, mostly manufactured to order in Paris, is constantly receiving important additions of the latest inventions to keep pace with the progress of science.

Museum.

This room contains a collection of four thousand specimens of mineralogy, conchology, fossils, petrifactions, volcanic matters, natural curiosities, and other instructive objects from various parts of the world. For the study of crystallography there is a complete set of sixty-five magnificent glass models of very large size, showing, by an ingenious contrivance, the axes of each variety of crystals, and their abnormal combinations.

Literary Congress.

The Literary Congress is composed of two co-ordinate branches, the Philalethic Senate and the House of Philhistorians. In its form and method of procedure the Congress of the United States has been taken as a model, the President of the College filling, ex-officio, the place of the Executive. By such an organization the members may not only enjoy all the advantages afforded by debating societies, but at the same time acquire a practical knowledge of parliamentary law and the manner in which legislative bodies are conducted.

Weekly meetings for debate are held throughout the year; elections of officers semi-annually. Each of these literary societies has a choice and well stocked library and reading room, open every day to its respective members.

Libraries.

There are nine sectional or branch libraries, located in the

various departments and selected severally with a special view to the particular wants of the Professors, the Normal School, the Science room, the Philalethics, the Philhistorians, the Sodalities, the Congregation, the Dramatic and the Musical society. The principal Library of the College though containing not more than fourteen thousand volumes, possesses one of the choicest collections of books in the State. Many of the works are very rare, some nearly four centuries old, and in an excellent state of preservation. Among the numerous works worthy of notice is a collection of three hundred and fifty volumes reproducing in their original text, the most prominent historical and polemical writings of antiquity, from the first century of the Christian era to the ninth; a manual of asceticism in thirty-three languages, and a manuscript choir-book on parchment, bound in wood and massive bronze.

Exhibition Hall.

This building is 113x143 and 76 feet high. The hall is principally used for exhibitions, literary and scientific. Dramatic exercise being acknowledged to afford the best means of teaching elocution, the students have formed among themselves a Senior and a Junior Dramatic Society. Their selections are for the most part from the classic and legitimate drama, which they occasionally present to the public. For this purpose the hall is provided with a stage. By a happy combination of the dimensions and materials of the walls and ceiling, the acoustic properties of the hall have been secured with very satisfactory results. The auditorium, on a conveniently sloping floor, is 91 feet deep, 70 feet wide, and 42 feet high, and is surrounded by spacious galleries, the whole being fitted up with elastic slat seats of a comfortable pattern, and capable of accommodating 3,000 spectators. The stage is 38 feet deep, the opening of the procenium 34 feet wide. It is provided with all the necessary appurtenances of green-room, property-room,

paint-shop, elastic gas pipes, hydrants and hose, &c. There are 14 sets of scenery of considerable merit, and a very handsome drop curtain, as also a large assortment of ancient and modern costumes. This building, as well as the others, is earthquake proof, and has ample means of egress, both from the main floors and the galleries. The stairs at each of its four corners are enclosed in independent turrets, thus adding much to the safety of the building.

Literary and Commercial Department.

The dimensions of this building are 184x43 feet. The first floor is divided into the class-rooms of Rhetoric, Grammar, and Languages. The second floor is occupied by the Commercial rooms. As it not unfrequently happens that young men, after having studied book-keeping for years, are yet much embarrassed in its application to business transactions, the College offers the great advantage of a peculiar department calculated to obviate that difficulty. The object of this department is to represent, as faithfully as possible, the commercial world in miniature, thus affording the students an opportunity of becoming thoroughly acquainted with the intricacies peculiar to each branch of business. For this purpose there are two large halls fitted up with elegant offices, which are in themselves miniature commercial houses of beautiful architectural designs. These offices or houses represent the more important lines of business, such as Importing, Jobbing, Forwarding, Real Estate, Insurance, Brokerage, Commission, General Agency, Merchandise Emporium, Banking, &c. There are also three Telegraph offices, a Post Office, an Express office, and a Register and Treasury office. All of the above named offices, or business houses, are ranged along the walls, while the central parts of the halls are occupied by fine standing desks for general merchandising business. Between the two halls a room neatly fitted up as a private office of the Director, is accessible to the students for consultation.

A CORNER OF THE LIBRARY.

A Tribunal of Commerce for the adjustment of cases by legal procedure holds its meetings in a neatly furnished hall which has the appearance of a regular court room.

The telegraph line of the Department is in communication with other College buildings, whence, as if from abroad, a Board of Brokers receives regular Financial and Stock reports.

School of Design.

To artistic drawing, as well as architectural and mechanical, is allotted a spacious room, lighted on three sides, and furnished with appropriate fixtures.

Music.

For the cultivation of this art the pupils have good opportunities offered by the College Brass Band under the name of "Cecilian Philharmonic Society," and the College String Band. Their special object is the rendering of operatic and classical music.

The musical library for the preparation of select pieces, contains the complete works of many of the great masters, and an extensive collection of choice music of all the best composers.

There are ten music rooms and ten pianos.

Dormitories.

There are two dormitories, one of 90x70 feet for the Senior Division, and the other nearly as large, for the Junior Division. Both are furnished with neat and comfortable single beds, and the means of perfect ventilation. Each dormitory is under the supervision of two Fathers. The hours for sleep are from 8 P. M. to 6 A. M. (6½ in winter). The elder students, however, may sit up to study till 9¼ P. M.

Toilet Rooms.

Attached to each dormitory is a toilet room where each

student has the exclusive use of a section, with private cupboard, faucet, boot-stool, towel rack, &c. Besides being required to attend carefully to his morning toilet, every one is expected to rearrange it before dinner and supper.

Dining Hall.

It is a cheerful airy room of 87 x 35 feet, decorated with suitable paintings. Each table seats fourteen students. The fare is plentiful and substantial. Breakfast is served at 7½, dinner at twelve, and supper at 5½ o'clock.

Play-grounds.

These occupy nearly four acres of ground, gently sloping and sandy, so that very soon after the heaviest rain, they are dry enough for recreation. On three sides are numerous shade trees and seats. Verandas of an aggregate length of a thousand feet extend along the building, affording shelter and exercise in rainy weather. There are besides two large gymnasiums and play-rooms supplied with chess and checker games, &c. Athletic games, however, receive more encouragement than others. On Thursday and Sunday those who wish, may go out walking in the country in company with some of the Fathers.

Swimming and Bathing.

At the proper season the students are allowed to bathe in an artificial swimming pond 160 feet long and 120 feet wide, located on the college property near the old Mission orchard. It is surrounded by a brick wall sunk level with the ground, and is shaded by poplar trees. Its bottom is sloping so that a part of it is shallow for beginners, while the rest is deep enough for proficient swimmers. The water is supplied by an artesian well in the center of the pond. To guard against the possibility of accidents the students are not allowed to go swimming, unless accompanied by some of the tutors. In winter they have warm baths at the College.

THE CHEMICAL LABORATORY.

Infirmary.

For the sick and convalescent there is a neatly furnished infirmary of twenty private rooms, with a well stocked apothecary's shop and; besides the daily visits of an able physician, an experienced infirmarian is constantly in attendance.

Moral Training.

The students are, at all times and places, in the company and care of their tutors.

The offices of the several directors are open daily, where the students may call upon them and receive such private instruction and advice as they may desire, and may be conducive to their individual improvement.

SODALITIES and other societies are established for the cultivation of a gentlemanly and Christian spirit among the students. They have weekly meetings, appropriate exercises, and the help of special libraries. A lecture on points of morality and religion is given to all on Saturdays.

Memorial Chapel.

The chapel is 80x35 feet. It is lighted by two rows of stained glass windows, and is tastefully decorated with fresco paintings. Here the students have morning and evening prapers as well as Mass.

General Regulations.

No one will be admitted unless he has a good moral character.

Any one coming from another Institution will be required to produce a satisfactory recommendation from such Institution.

No one can become a pupil of the College for a shorter period than half a session.

As the members of the College profess the Catholic Religion, the exercises of religious worship are Catholic; but members of any religious denomination are received, provided they are willing, for the sake of order and uniformity, to be present, with propriety, at divine worship.

No student will be permitted to leave the College on visits of any length, except at the Christmas holidays, from the 23d of December to the 3d of January, if such be the wish of his parents or guardian.

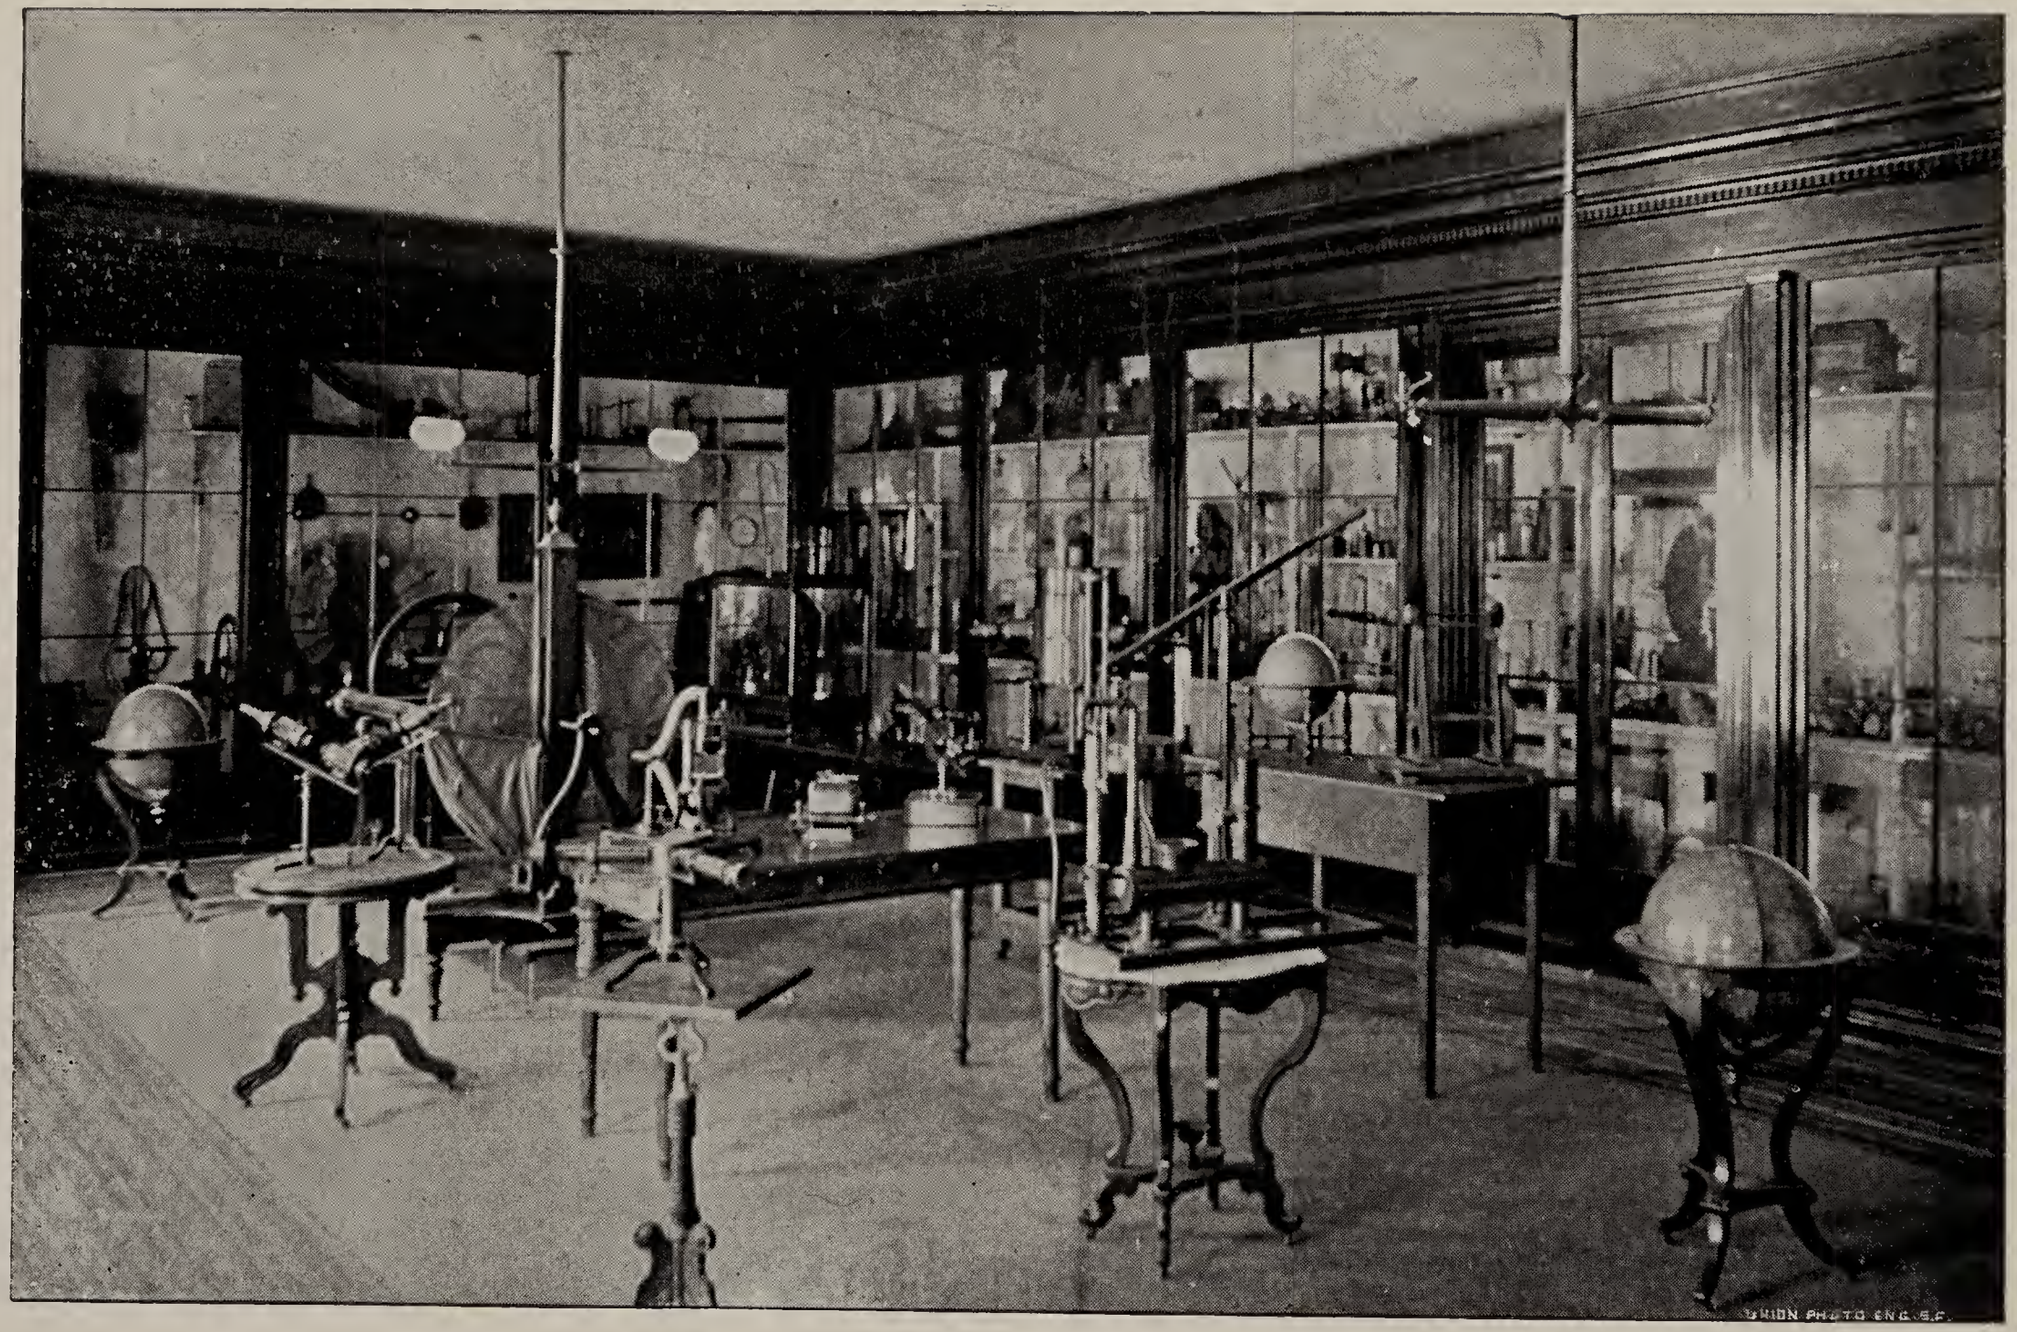
Those students whose parents live in the vicinity of the College are allowed to visit them once a month.

Students leaving the College for the summer vacation, or Christmas holidays, and failing to be present on the day appointed for reopening the classes, will, by the fact of absence, be excluded from the College until the following session; except cases in which the parents or guardian of the dilatory student shall show cause of absence, which the Faculty of the College shall consider wholly sufficient.

All Thursdays of the academic year are holidays, but should an extraordinary holiday fall on Tuesday, Wednesday, or Friday, classes may be continued on Thursday, as usual.

The students will not be allowed the use of tobacco.

The students will not be permitted to have any books or



THE PHILOSOPHICAL CABINET.

publications that have not been approved by the President.

To cultivate the heart, no less than to develop the intellectual and physical faculties of their pupils, is a duty kept constantly and sacredly in view.

Experience having proved the necessity of keeping the younger students apart from the older, their respective dormitories, play-grounds, study-halls, etc., are entirely separated.

The student's correspondence is subject to the inspection of the President.

To hold meetings or to form clubs or societies of any kind, without the consent of the President; the habitual use of profane language; any gross immorality committed either within or without the precincts of the institution; the possession or distribution of immoral publications or pictures; intoxication; procuring or introducing directly or indirectly into the College ardent spirits; habitual idleness and violation of the rules of the College; obstinate refusal to submit to a punishment inflicted; absence from the College at night without leave from the President; avowed principles of infidelity; express contempt or ridicule of religion, expose the offender to dismissal.

Special Directions.

On entering the Institution, the students must be provided with two pairs of sheets; three pillow cases; a white counterpane (eleven quarters by ten); three suits of clothes adapted to the season; a sufficient number of shirts, drawers, handkerchiefs, socks, boots, napkins, towels, combs, brushes and other necessary articles.

Violations of the established discipline of the College are suppressed in a mild but effectual manner. Should any stud-

ent prove refractory or immoral in spite of all efforts to correct him, he will be sent back to his parents or guardian.

Twice a year bulletins are sent to parents or guardians, to inform them of the health, deportment and application of their sons or wards.

All the clothes of the students are under the charge of a wardrobe-keeper, by whom they will be kept in good order.

The mending of clothes and boots is done in the Institution at reasonable rates.

For clothing, books, pocket money, and the like, no advance is made by the Institution. To meet such incidental expenses, a sufficient sum must be deposited with the Treasurer.

Students whose parents do not live in California, must have a responsible agent in the vicinity.

Whenever parents or guardians wish to have their sons or wards come home, they are requested to inform the President of the College by letter; and should they withdraw them from the College, they must settle accounts and forward money to defray traveling expenses.

N. B.—Parents or guardians, intending to place their sons or wards in this Institution, are recommended to send them at the commencement of the session in August.

Students who do not return home during the summer vacation are afforded accommodations in the homes of friends of the College, who, under the direction of the Fathers take care of them.

COMMERCIAL DEPARTMENT.

System of Instruction.

After a student has been admitted into the College, he is examined and placed in the class for which he may be fitted. He then passes on regularly either through the Classic, or the Commercial Course.

The Classical course embraces all the studies proper for those who aspire to the academical degree of A. B.

The Commercial course includes all the branches necessary to obtain the Commercial certificate.

The mode of teaching is such as to make the pupils understand their lessons independently of text books, and rely on the latter rather as a reference and guide, than as their only stock of knowledge.

Special and constant attention is paid, as well in the lower as in the higher classes, to English composition.

At any time during the year, and particularly at the first minor examination, if any one be found capable of passing to a higher class, he is promoted.

To excite laudable emulation, the honors obtained in the several classes by the students are announced monthly, and printed certificates given to those who have distinguished themselves in application or good deportment. An examination of all the classes takes place before the Christmas holidays, and before the close of the session.

At the end of the year, gold and silver medals and valuable premiums are distributed to the more worthy.

The scholastic year consists of but one session. It commences at the beginning of August, and ends at the beginning of June with a public exhibition—either literary or scientific—followed by the conferring of Degrees and the distribution of premiums.
